

Map Work: Fertile Lands and Civilization

Directions:

1. Using the "Unlabeled India Map Template", trace the rivers in blue.
 2. Then, shade in the ocean areas surrounding the Indian Subcontinent.
 3. Using green for fertile, grassy lands and brown for desert or mountainous lands, color India how you think it really is.
 4. Using what you have learned about where cities usually form and they type of geography that is around them, put purple stars where you think 5 major cities might be located.
 5. Launch Google Earth
 6. Search for "India"
 7. Check your map and answer the following:
- Were you correct about the geography types? What was different?

Supply List:

- Map Template (India, Unlabeled)
- Google Earth
- Colored Pencils or Crayons

- Were you correct about the cities? What was different?

- Does anything surprise you about where cities are located in India?
